Sequence 556, Application US/10923330

Publication No. US20050153916A1

GENERAL INFORMATION:
APPLICANT: Sirna Therapeutics, Inc.
APPLICANT: Beigelman, Leonid
TITLE OF INVENTION: Expression Using Short Interfering RNA (siNA)
TITLE OF INVENTION: Expression Using Short Interfering RNA (siNA)
FILE REFERENCE: 400/209 (MRHBDZ-708-C)
CURRENT APPLICATION NUMBER: US/10/923,330

CURRENT APPLICATION NUMBER: DC1/US03/04088

PRIOR FILING DATE: 2004-05-24

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Query Match
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            RESULT 170

US-10-923-330-583

US-10-923-330-583

Sequence 583, Application US/10923330

Publication No. US20050153916A1

GENERAL INFORMATION:

APPLICANT: Sirna Therapeutics, Inc.

APPLICANT: Beigelman, Leonid

TITLE OF INVENTION: RNA Interference Mediated Inhibition of Telomerase Gene

TITLE OF INVENTION: RNA Interference Mediated Inhibition of Telomerase Gene

TITLE OF INVENTION: RNA INTERFERENCE: 400/209 (WBHB02-708-C)

FILE REFERENCE: 400/209 (WBHB02-708-C)

CURRENT FILING DATE: 2004-08-20

PRIOR PLICATION NUMBER: PCT/US03/04088

PRIOR APPLICATION NUMBER: BCT/US03/04088

PRIOR PLING DATE: 2004-05-24

PRIOR FILING DATE: 2004-05-24

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             TUTLE OF INVENTION NO. EXPOSULES INC.

APPLICANT: Sirna Therapeutics, Inc.

APPLICANT: Sirna Therapeutics, Inc.

APPLICANT: MedSwiggen, James

APPLICANT: Beigelman, Leonid

TITLE OF INVENTION: RNA Interference Mediated Inhibition of Telo

TITLE OF INVENTION: Expression Using Short Interfering RNA (sin

TITLE OF INVENTION: Expression Using Short Interfering RNA (sin

FILE REFERENCE: 400/209 (MBHB02-708-C)
